THE LEAVENWORTH BRIDGE.

We see by our exchanges that work on the bridge across the Missouri river at Leavenworth is in fine way and that its completion is vouchsafed at no distant period. Its substantiality is evidenced by the last pier being sunk eighty feet.

Every Kansan who has the native pride of home at heart will feel encouraged over the success of this enterprise. It off from Salina as we dislike to see three s a work that will add largely not only to the materially advantages of Leavenworth but to the reputation of the State. For every dollar put in any of our cities the State is proportionately benefitted. With a due amount of energy and capital expended by her citizens in other enterprises, this bridge will crown Leavenworth the commercial metropolis of the Missouri river. Heretofore it has been a dog's fight between St. Joseph, Kansas the ascendency. The completion of this bridge will place Leavenworth, Kansas and the west in direct communication with the East. With the railroads being and to be built one may soon start from Colorado and pass by Leavenworth, by shortened route on to Chicago without leaving his seat on account of any water to course. The great regret is that the us bearing the names of Sharp & Dow- bridge was not made years ago. It would county, on the L. L. & G. R. R.
